

Human Connection Drives Better Health

At Cecelia Health, our dedicated, highly trained clinicians work with your members to address critical care gaps through human-led interventions that leverage digital touchpoints. It's our unique model that drives valuable health outcomes.

What we do

Offer clinical expertise across multiple conditions including diabetes, cardiovascular, respiratory, and obesity

Deliver virtual clinical support for disease state education, device initiation and training, and remotely monitor patients

Enable access to national, virtual endocrinology network

Analyze data to stratify patient populations based on risk level

...and more!

Our impact

65%+

Open care gaps closed: PCP visit, eye exam, kidney, screenings, vaccinations, etc.

50%+

Enrollment rate of eligible members reached

80%+

Medication adherence at 12 months

1.5pt

A1c reduction for high-risk patients with diabetes

**Our approach
is proven to
impact outcomes
across Blues
populations**
