

Virtual, Human Care

At Cecelia Health, our dedicated, highly trained clinicians work with your members to address critical care gaps through human-led interventions with digital touchpoints. Our unique model drives valuable health outcomes.

What we do

Offer clinical expertise across multiple conditions including diabetes, chronic kidney disease, cardiovascular disease, respiratory, and obesity

Deliver virtual clinical support for disease state education, device training, and remote patient monitoring

Enable access to a national network of clinicians endocrinologists licensed in 50 states

Impact HEDIS lift across several measures including disease-specific and member experience
