

Diabetes Growth Demands Action

Diabetes Crisis in America

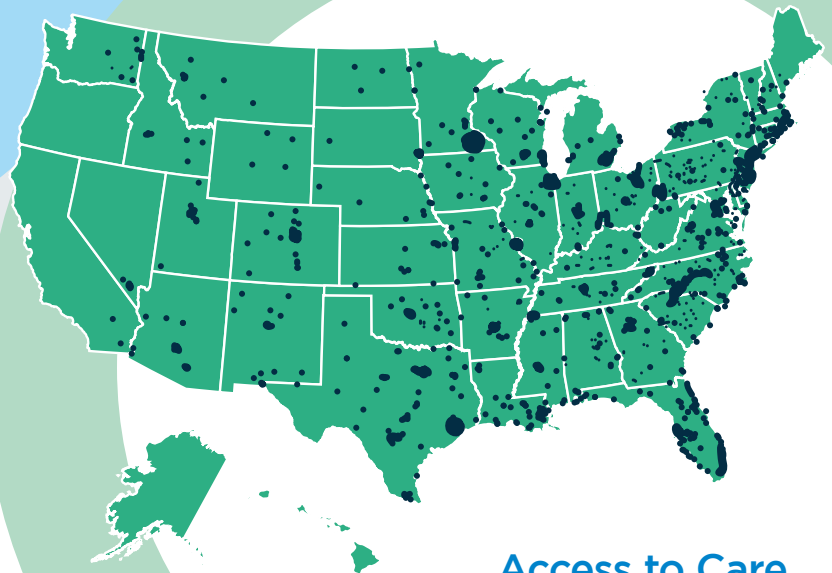

A Growing Number of Americans are Adversely Impacted by Diabetes, Leading to Escalating Costs

3-6 month
Wait time per person

Fewer than **8,000**
Endocrinologists in the United States

Average **4,000**
Patients per Endocrinologist

Access to Care

The limited number of practicing endocrinologists in the United States impedes the ability of people with diabetes to obtain the care they need.

Cost

Total Annual Cost in of Diabetes in the United States Includes direct and indirect medical expenditures. (Cost in \$billions USD)

2012 **\$245bn**

2017 **\$327bn**

2030 (PROJECTED) **\$633bn**

\$16,752 per year

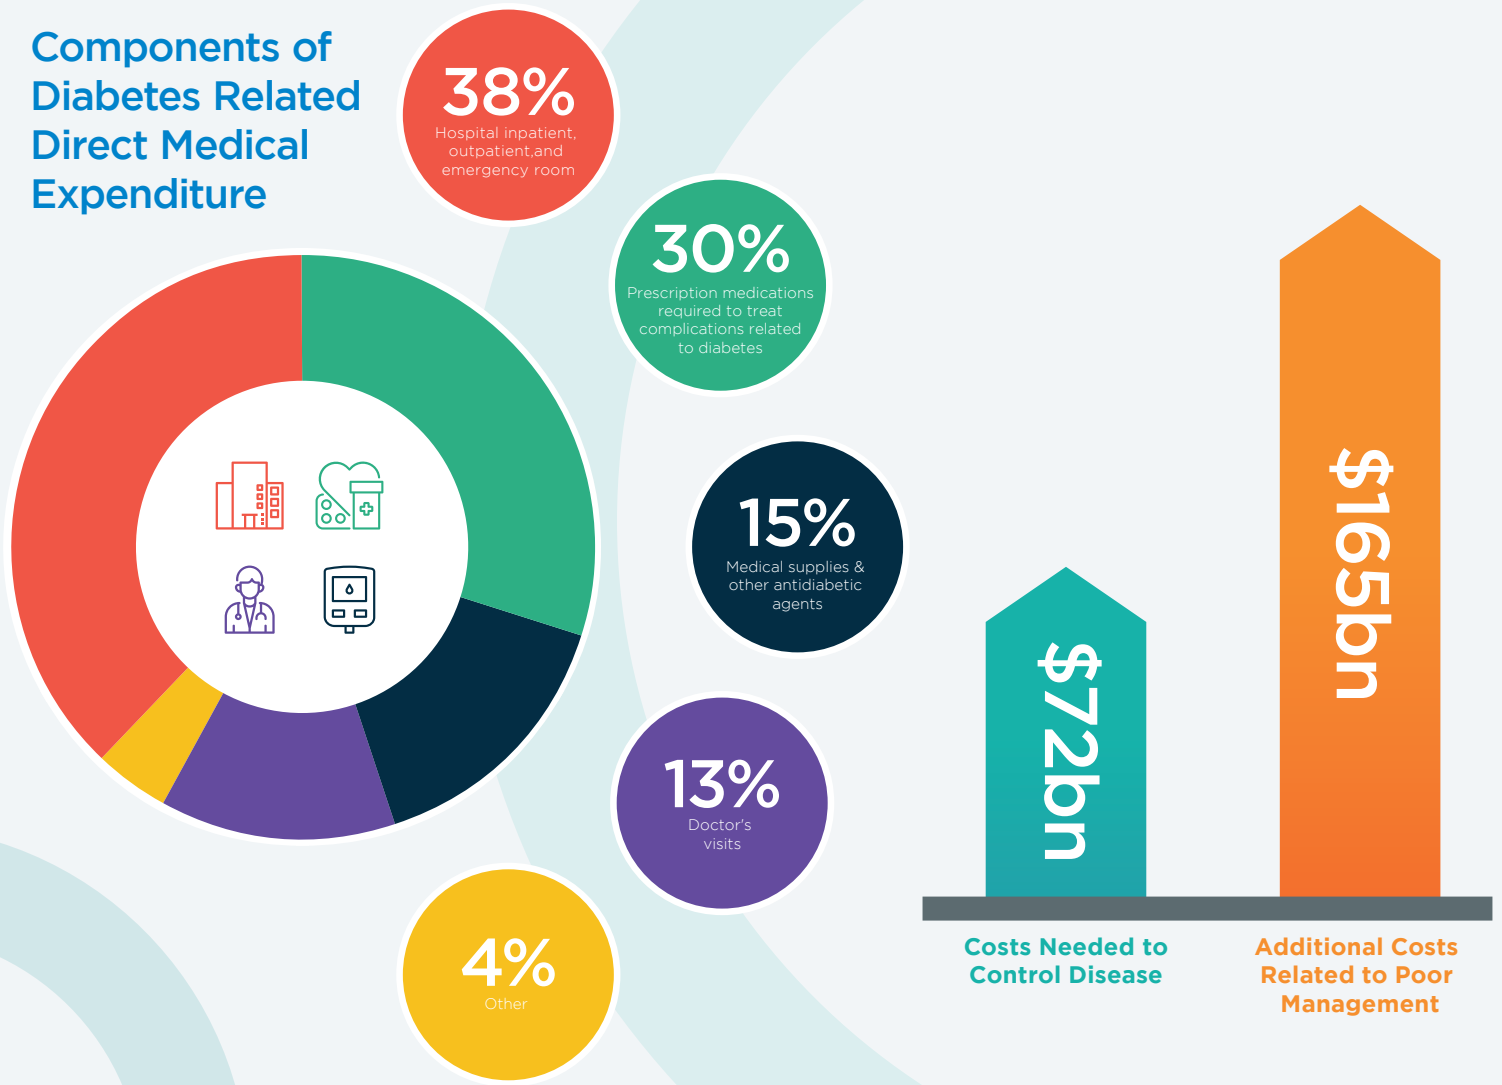

People with diabetes incur an average medical expenditure of \$16,752 per year. However, there is a significant difference in cost between those that manage their diabetes effectively and those that are not effective at managing their disease given the many social, economic, and geographic barriers that exist.

\$27,000 per year

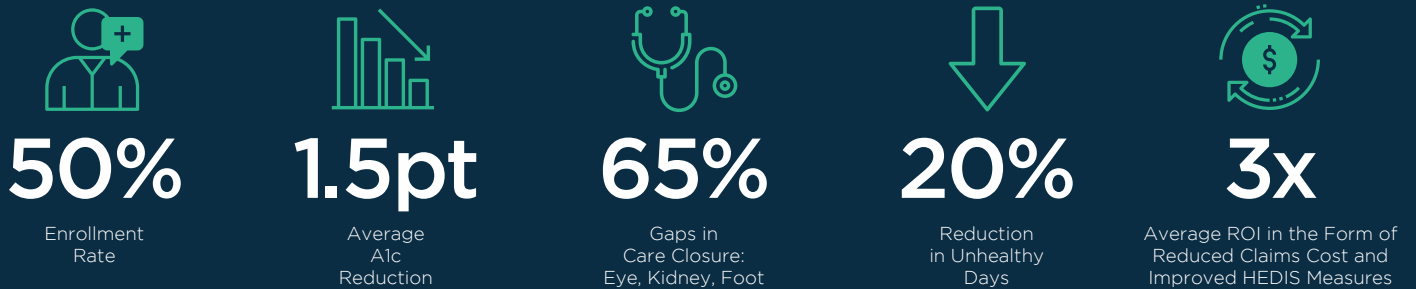

Individuals who do not successfully manage their disease may experience costs up to **60% higher on an annual basis that could represent as much as \$27,000 in annual spend.**

Poorly managed individuals with diabetes often represent **more than 40% of total payer spend.**

Components of Diabetes Related Direct Medical Expenditure
